The Chief Minister met with officials from Mitsubishi Corporation India Limited to discuss the progress of the Energy Storage System Project and their interest to invest in other sectors in Andhra Pradesh.

They reported that Mitsubishi Corp. and AES (USA) jointly installed the latest energy storage system in Tata Power Delhi Distribution Limited (TPDDL) for stable power distribution.

The Chief Minister said that storage is an important requirement for the state. “We are investing in thermal, hydel, gas and solar power, but storage can decrease the cost and increase the capacity of power in the state”, he said.

“The current transmission loss of power is 9.7%, but with the right infrastructure of energy storage, we can reduce it to 2-3%”, he added.

Mr. Eisuke Shiozaki, Chairman and Managing Director, and Shuhei Ando, Deputy Planning & Coordination Officer of Mitsubishi Corporation India Pvt. Ltd., explained about their experience and keen interest in agriculture, airport development, food processing, leasing equipment resources and electric vehicles and vehicle battery production.

In agriculture, they were interested in setting up a network for the supply of genuine pesticides and machinery for lease to SHGs and FPOs.

“We are interested to outsource pesticide supply to service providers who can use drone application”, said the Chief Minister.

They said that they are willing to work out a proposal and come back to use drones for soil testing, canal maintenance and other purposes.

Solomon Arokia Raj, Secretary to Government (Industries & Commerce) and Hitoshi Kono, EVP & Deputy Managing Director of Isuzu were also present at the meeting.
